

Loops in Python

Estimated time needed: **20** minutes

Objectives

After completing this lab, you will be able to:

- Work with the loop statements in Python, including for-loop and while-loop.

Write a Python program using a for loop that prints numbers from 1 to 15 but:

- Skips multiples of 3
- Stops the loop if the number is greater than 12

Write your code below and press Shift+Enter to execute

```
for i, x in enumerate(['A', 'B', 'C']):  
    print(i, x)
```

0 A

1 B

2 C

[Click here for the solution](#)

```
for i in range(1, 16):  
    if i % 3 == 0:  
        continue # skip multiples of 3  
    if i > 12:  
        break # stop if number > 12  
    print(i)
```

The last exercise!

Congratulations, you have completed your first lesson and hands-on lab in Python.
